SUMMARY

Aspiring Machine Learning Engineer and Software Engineering undergraduate with hands-on experience in building ML-integrated applications using Python, React, and FastAPI. Strong foundation in data analysis, algorithm development, and full-stack development. Passionate about solving real-world problems using AI/ML and contributing to impactful projects.

SKILLS

- Languages** : Python, JavaScript, TypeScript, Dart, Java, Kotlin, SQL
 - Frameworks** : TensorFlow, Scikit-learn, React.js, Flutter, Flask, Node.js, Next.js, Springboot
 - Tools** : Git, Azure, Docker, Prisma, Postman, Firebase, MongoDB
 - Concepts** : ML, DL, MLOps, LLMs, API Development
 - Soft Skills** : Problem Solving, Critical Thinking, Team Collaboration, Time Management
-

EDUCATION

B.Sc.(Hons.) Software Engineering **July 2023 - Present**

University of Kelaniya

- CGPA: 3.25/4.0
- Specializing in Net-Centric Applications, Data Science, Mobile Applications, and Game Development.

G.C.E. Advanced Level **July 2019 - February 2022**

Walisinghe Harischandra College, Anuradhapura

- Z-Score: 1.6978
-

EvaluationHour.ai – Mock Interview Platform **April 2025 – Present (Ongoing))**

(Individual)

[GitHub Repo](#)

Building an AI-powered platform for mock interviews with real-time chat and voice interactions. Uses LangChain to connect with LLMs, Pinecone to store interview questions as vector embeddings, and MongoDB for user/session data. Includes speech recognition, text-to-speech, and personalized feedback based on responses.

- Keywords: mock interviews, LLMs, voice interaction, semantic search, career tech
- Technologies: React.js, Tailwind CSS, Python, FastAPI, LangChain, Pinecone, MongoDB, WebSockets, Text-to-Speech, Speech Recognition

FuelMaster – Fuel Management System

January 2025 - February 2025

(Academic Group Project)

[GitHub Repo](#)

Developed a full-stack fuel management system for vehicle owners and fuel stations. Key features included fuel station and vehicle owner registration, vehicle registration with QR code generation and renewal, a mobile QR scanner app for pumpers, and real-time fuel quota updates via SMS. The system included OTP-based registration and a mock integration with a government vehicle registry.

- Keywords: QR code authentication, real-time fuel quota, SMS & OTP verification, Heroku
- Technologies: Spring Boot, PostgreSQL, React.js, ShadCN, Flutter, Axios, Tailwind CSS

Face Unlock System

August 2024 - October 2024

(Freelance)

Private Repo

Built a Flutter-based door unlock system using on-device face recognition (TFLite + MobileFaceNet). Unrecognized users verified via fitness app QR scan, which also registered new faces automatically.

- Keywords: Face recognition, biometric authentication, fallback QR flow, automated registration
- Technologies: Flutter, TensorFlow Lite, MobileFaceNet, FaceSDK, REST API

Fitness Application

June 2023 - December 2024

(Freelance)

Private Repo

Built and published a cross-platform fitness app using Flutter for a foreign gym network. Features included virtual dietary consultations, in-app live trainer sessions, workout tracking, fitness reports, audio calling, health data and smartwatch integration, and bookings for physiotherapy and medical consultations.

- Keywords: Real-time messaging, health data sync, subscription plans
- Technologies: Flutter, API Integration, ZegoCloud, Firebase, Lottie, payment gateway

ACHIEVEMENTS

- **1st Runner Up:** Junior Hack: 2025 Intra university Hackathon, organized by SESA University of Kelaniya
- **Finalist:** CryptX 1.0 Hackathon, organized by ICTS, University of Sri Jayewardenpura.

ADDITIONAL INFORMATION

- **Languages:** Sinhala(Native), English(Intermediate)
- **Certifications:** IBM Machine Learning Professional Certificate, Intro to Machine Learning(Kaggle)

VOLUNTEERING

- **Web Master:** July 2024 - Present
Software Engineering Students' Association (SESA), University of Kelaniya
